Innovative Fishing Floats and Accessories

CRALUSSO,
CHOICE OF THE WINNERS

www.cralusso.com

From the 900.000 enterprises based in Hungary Mr. Karoly Kralik was chosen, due to his domestic and international results, the creator of Cralusso float range was asked to become a Hungarian Talent Ambassador.

When I decided to launch Cralusso I knew that instead of improving on existing products I would have to set off in an entirely new direction, developing new solutions and technologies. Our revolutionary innovations, such as our ground-breaking fishing floats enabled users to win countless world, European and national championships. During the recent years and months we have been focusing on reforming feeder and method equipment. Our unrivalled models were developed with the help of cutting-edge 3D printing technology. I am sure we have made our mark – these products can help make fishing even more enjoyable and successful.

Cralusso, choice of the winners

In 2015 has reached another World Cup victory with our products. The Club's Team World Championship, which held in Zilina, the Slovakian Team take possession of first place with Cralusso floats

Main milestones:

- 2002: Launch Cralusso
- 2003: World Championship – Torpedo
- 2005: European Championship – Torpedo
- 2006: Innovation Expo, GENIUS award
- 2007: U.S. Open – Golf and Bubble
- 2008: European Championship – Torpedo
- 2008: U.S. Open – Shark
- 2008: Hungarian National Championship – Shark
- 2009: Best Stand award
- 2010: Sponsorship at Poznan World Cup
- 2012: Title of Hungarian Talent Ambassador
- 2013: Expand the NAVIGATOR line
- 2014: Dutch men's team – the title of world champion
Hungarian team of disabled people – individual and team title of world champion
Hungarian team of veterans – world champion bronze medal

- 2015: Best Stand award
Slovakian Team won the Club Team World Championship with Torpedo floats
- 2018: Our company has won a research and development tender. We have established our development workshop equipped with state-of-the-art machines to provide a foundation for the innovations in the coming years.
- 2019: The Bosnian team that won club world championship using our Raj and Torpedo floats in Prelog, Croatia.

József Pilán, Cralusso's test angler was awarded a world championship bronze medal at the age of 70.

A new hydrodynamic form developed by Cralusso, the body does not lift out the water when held back. This float is for use on the pole and is ideal for use in medium or strong flow when you wish to present static or slow moving baits. It is so good and reliable that it has become the number one choice of flat float for anglers of all abilities including a few world champions!

Some quotations about the Torpedo:

- **Alan Scotthorne:** "The best flat float I've ever used"
Angling Times, May 10 2005.
- **Bob Nudd:** "It will add a new dimension to your polefishing"

Angling Times 31 May 2005

Sizes:

0.5 - 0.75 - 1.0 - 1.5 - 2.0 - 3.0 - 4.0 - 5.0 gr

PUR

Code: 1001

TORPEDO Tuning

An advanced version of the Torpedo float, which helped the Hungarian team to win gold in the 2003 World Championship. The Torpedo Tuning was also the success story of the 2005 European Championship - 80% of the contestants used our floats, including Will Raison, the individual champion.

As with the Torpedo, this float is for use on the pole and is ideal for use in medium or strong flow when you wish to present static or slow moving baits.

Sizes: 6 - 8 - 10 - 12 - 15 - 20 - 25 - 30 - 40 - 50 - 70 gr

With recommendation of Tibor Ambrus, world champion

Year
Guarantee

Bubble

Code: 1003

A river float designed for use on the pole but has found favour with many anglers on the running line. It is ideal for running through the swim at variable speed. The Bubble was introduced in 2005 Madunice European Championship.

The winner of U.S. Open in 2007 and 2008!

Variable antenna 1-5 gr 2 pcs
Variable antenna 6-20 gr 5 pcs
Waterproof polyurethane body
Floats can be changed without dismantling the rig

Sizes:

30 - 40 - 50 gr

The next step of success!
József Papp won the 2008 U.S. open using
a Cralusso Bubble

SHARK

Functions of two floats in one 2 in 1

Code: 1004

1
Year
Guarantee

- 1 You should use the first antenna position when you are holding the float back hard or even lightly.
- 2 You should use the second antenna position when you want the float running through the swim

Sizes:

1 - 1,5 - 2 - 3 - 4 - 5 - 6
8 - 10 - 12 - 15 - 20 gr
25 - 30 - 40 - 50 gr

Shark, the brand new flat float was developed using many years of experience in float design and was in response to the demand from professional anglers. Used primarily for pole fishing the float can present baits in many ways. The antenna position can be changed according to your technique – whether this is holding back hard or running the float through the swim.

When the current is strong or you are holding back hard use the first bristle position. When the flow is slower or you want to run the float through the swim the second bristle position is recommended.

The streamline hump on top of the float – the sharks fin – aids stability and sensitivity – even the smallest of bites can be seen clearly.

The introduction of the Shark was at the Hungarian National Championship in 2008, where Tibor Ambrus, one of the leaders of the Tubertini-MarosMix-Cralusso group won the competition using this new float.

Choice of the Champions

Code: 1027

This hard-wearing polyurethane disc float developed by Cralusso can take the place of traditional balsa models, that can be damaged easily.

Sizes:
1 - 1,5 - 2 - 3 - 4 - 5 - 6 - 8 - 10 - 12 - 15 - 20 gr
25 - 30 - 40 - 50 gr

The favourite float of the world championship held in Croatia in 2014, helping the Dutch team to earn the title of world champion

In this competition, Alan Scotthorne – five times individual world champion of England – and many other teams have used the innovative Cralusso floats!

Surf

Code: 1002

A special river float for use with rod and reel set ups that can be held back hard without drifting in across the flow. The direction and speed can be changed easily offering perfect and accurate presentation. Ideal for medium and strongly currents although it can be used on still water for predator fishing when you wish to work a baitfish parallel to the bank.

Sizes:
3 - 4 - 6 - 8 - 10 - 12 - 15 - 20 gr

Bolo

Code: 1005

Sizes:
3 - 4 - 6 - 8 - 10 - 12
15 - 20 gr

A river float for use Bolognese rods and any running line set up. The design allows you to hold the float back without it drifting in across the flow. You can vary the speed of travel easily, but in sufficient flow and by holding back hard it is possible to lead the Bolo out from the bank toward features, cover or your feed line. You can effectively position the float before letting it run through the swim.

Revolutionary new waggler designs from Cralusso

ROCKET

Code: 1006

We developed the Rocket for long, accurate, straight casting. The Rocket has unique features that enable it to fly much better than traditional wagglers - even those with flights

- ① ② ③ ④

Thanks to the versatile and adaptable antenna system, twenty Cralusso sight tips can be used with this float. Three tips are contained in each pack.

The stem of the float is made from a material that is very strong and will remain straight without becoming twisted or curved.

The calibration system helps quick, simple and accurate adjustments. with 0,05 gr graduations being possible

The aerodynamics are improved with surface indentations (as on a golf ball) which reduces air resistance and increases stability.

①

②

③

PUR

The critical element of the Rocket design is the special attachment system. This ensures the optimum position of the float and the terminal tackle it is 'towing' during flight - thus ensuring maximum distance and accuracy is achieved.

When you use this floats after casting you should hold back the float before it falls down into the water to eliminate the possibility of tangles.

| Size gr | Changeable weight |
|---------|-------------------|
| 6 | 2,0 gr |
| 8 | 2,5 gr |
| 10 | 3,0 gr |
| 12 | 3,0 gr |
| 14 | 3,0 gr |
| 16 | 3,5 gr |
| 18 | 3,5 gr |
| 20 | 3,5 gr |

Recommended float adaptors:
Anti tangle waggler attachment
Size: Small, Medium
Code: 2006

How to use this attachment?

The short stem faces toward the rod.
The long stem is faces toward the hook.

Code: 1007

The Ufo and Dart floats utilize Cralusso's innovations, which give them their efficacy and popularity.

- 1
- 2
- 3
- 4

Adjusting the antenna and the sensitivity can be performed repeatedly using the calibration solution. They've become preferred by the anglers because of their versatile, simple usage and their durable design.

The concept is the same as that found in the UFO waggler but in addition to the other latest developments this version incorporates a flight.

- 1
- 2
- 3
- 4

The body is made of polyurethane, which is not sensitive to surface damage. The Dart is a very versatile float, which is a suitable for both pleasure and match anglers alike.

PUR

The aerodynamics are improved with surface indentations (as on a golf ball) which reduces air resistance and increases stability.

- Recommended float adaptors
- Waggler Attachment Light: 2005
- Brass Head Safety Snap: 2122
- Plastic head swivel with interlock snap: 2123

4

Code: 1014

This model – Rocket Light – has an extraordinary flying ability. While retaining incredible accuracy it is possible, because of the attachment system, to cast 20-30% longer distances than with traditional floats.

| Size gr | Changeable weight |
|---------|-------------------|
| 1,5 | 1,0 gr |
| 2,0 | 1,0 gr |
| 2,5 | 1,0 gr |

| 12 | 3,0 gr |
| 14 | 3,5 gr |
| 16 | 3,5 gr |
| 18 | 4,5 gr |
| 20 | 5,5 gr |

The removeable dart wings help the floats to the flight.

To achieve a more precise setting and presentation we have built in the Cralusso calibration system into the 4 - 5 - 6 and 8g Rocket Light floats

The tube is made of a special plastic, is made for hard work and a long life and does not bend or warp. The float is ideal for many methods but particularly good in shallow and/or clear waters.

The aim of continuous innovation to create the best waggler float!

ARROW waggler

Code: 1040

Incorporates a removable brass disc weight system and, of course, all the usual Cralusso innovative features

- 1 2 3 4

The ARROW waggler ensures an aerodynamic flight, high levels of sensitivity and offers a multifunctional, easy to use float. The longer stem offers the following advantages:

- Generates extraordinary stability and distance in flight
- The body and main weight of the float sits deep in the water and it is therefore less influenced by wind and surface skim
- The long float aids the important task of getting your line deep in the water

Transportation of the long float is not difficult as the stem and body can be separated. This allows the carrying of made up rods where required with no risk of float damage.

| Size gr | Changeable weight |
|---------|-------------------|
| 8 | 3,0 gr |

| 10 | 2 gr |
| 12 | 3 gr |
| 14 | 4 gr |
| 16 | 5 gr |

PUR

Strengthened pillow swivel built-in the lead head

The new combination of lead and tungsten weight discs has a high specific gravity and is therefore only half the volume of brass.

WolframMatch

Code: 1085

We have been ecstatic over the success of the Arrow waggler but we never rest and have achieved even further improvement for this year. In addition to the already successful developments

① ② ③ ④

we are now using a weight system that is twice as heavy as brass.

This lead/tungsten combination disc system together with the new aerodynamically refined body has created an even better flight, operation and precision in use.

The antenna system consists of over 20 versions with varying diameters, lengths and colours available. New to this range are the 'air antenna' - a clever highly visible tube and a very sensitive solid option.

| Size gr | Changeable weight |
|---------|-------------------|
| 8 | 2,5 gr |
| 10 | 4,5 gr |
| 12 | 6,5 gr |
| 14 | 8,5 gr |
| 16 | 10,5 gr |
| 18 | 8,0 gr |
| 20 | 10,0 gr |

Tip: With the help of the unique calibration system you can speed up the float setting process and also achieve very precise setting of the antenna.

Strengthened pillow swivel built-in the lead head

New antenna with helium

Professional waggler float with calibration system, new body shape, made using tungsten & helium!

Code: 1086

Our newest innovation, the HELIO waggler float incorporates the best of our knowledge. We used materials with the most optimal density, this means that the lead head, the tungsten discs and the helium-filled float body and shank provided the possibility to build an ideal float, which

- has the best flying capabilities;
- can be set to the highest sensitivity
- can be weighted in the shortest time
- has a stem that does not bend even on higher temperatures
- resists damage
- can hold over 30 types of antennas

| Size gr | Changeable weight |
|---------|-------------------|
| 8 | 2,5 gr |
| 10 | 4,5 gr |
| 12 | 6,5 gr |
| 14 | 8,5 gr |
| 16 | 10,5 gr |
| 18 | 8,5 gr |
| 20 | 10,5 gr |
| 25 | 10,0 gr |
| 30 | 15,0 gr |

Attention! The body and stem of the floats are filled with helium, the calibration stem shouldn't be extended further than the red mark!

New antenna, with helium

PUR

Lead - tungsten combined weight system

The new combination of lead and tungsten weight discs has a high specific gravity and is therefore only half the volume of brass.

ProSlider

Code: 1087

Heeding the requests of the anglers, we added to our offer this easy to use, easy to throw Slider float, which satisfies the highest demands of the hobby and sport anglers. The 3.0 gr net weight of the special slider head and the design of the PUR body give excellent flying capabilities to the float. It is mainly recommended for deep water and lakes with strong currents, when the bait needs to be sunken to the vicinity of the lakebed quickly and in a stable way.

- Simple, precise usage
- Fastest antenna and sensitivity adjustment with the help of the calibration system.
- Versatile variability for weighting
- Replaceable solid and air-filled antennas

| Sizes |
|-------------|
| 3 + 8,0 gr |
| 3 + 10,0 gr |
| 3 + 12,0 gr |
| 3 + 14,0 gr |
| 3 + 16,0 gr |
| 3 + 18,0 gr |

Tip: The new waggler stem set (Item: 2034), increase the capacity and variability of the float. The different length of stems (250-330), can be accelerate the balance, furthermore increase the distance of flight.

Sizes: 8-10-12-14-16-18 gr

Sensitive

Code: 1010

BREAM FLOAT

Code: 1082

Sizes: 5 - 7 - 9 - 11 gr

Variable antenna 2 pcs

| Type | Distance of Casting | Changeable weight |
|---------------------------------|---------------------|-------------------|
| Velence 5-11 gr | 35-60 m | 1,0-2,5 gr |
| Rocket 6-20 gr | 40-85 m | 2,0-3,5 gr |
| Rocket light 1,5-8 gr | 20-60 m | + 1,0 gr |
| Dart 6-20 gr | 35-65 m | 2,5-5,5 gr |
| Sensitive 5-11 gr | 35-55 m | 1,5-3,0 gr |
| Ufo 6-20 gr | 30-50 m | 2,5-5,5 gr |

The advantage of these floats is the excellent sensitivity! The Velence and the Sensitive incorporate all of Cralusso's new technical solutions

| Size gr | Changeable weight |
|---------|-------------------|
| 6 | 1,5 gr |
| 8 | 2,5 gr |
| 10 | 3,0 gr |
| 12 | 4,0 gr |
| 14 | 5,0 gr |
| 16 | 6,0 gr |

By sliding the tube to calibrate the float you can minutely adjust the weighting.

Variable/removable weights in the body of the float

Strengthened pillow swivel built-in the lead head

Pellet

Code: 1011

This near indestructible float has been made for the ever more popular method of pellet waggler fishing. Being short it can be used successfully when fishing shallow and presenting baits deeper is no problem. You can fish precisely with different sizes and weights of pellet by making adjustments to the capacity of the float using the calibration system.

PUR

Sizes: S - M - L

Multicolor waggler

Code: 1013

|---------|-------------------|
| 8 | 2 gr |
| 10 | 2 gr |
| 12 | 2 gr |
| 14 | 2 gr |

Unweighted slider floats

Code: 1029

Code: 1030

Sizes: 3-4-5-6-8 gr

Sizes: 3-4-5 gr

Rocket Pellet

Code: 1012

This float incorporates all the advantages of the pellet float but also utilises the rocket system. Normal pellet wagglers are hampered in flight because the float is trying to tow a big bait. Aerodynamics, distance and accuracy are therefore adversely affected. The Rocket Pellet overcomes all these problems and is the perfect solution – even with heavy reel lines it can cast long distances and is very accurate.

PUR

Sizes: M - L

CONTROL MATCH

Code: 1023

Cralusso's newest development is a perfect solution for the problems of many anglers. We have used the very popular calibration system from our bodied wagglers and have also managed to incorporate this system into our revolutionary new straight wagglers. The slim body creates a very sensitive float and the calibration system makes very fast and accurate adjustment possible.

CONTROL MATCH with dart

Code: 1024

The construction of this float is the same as the "Control Match", but we incorporated dart flights into the stem to allow even better flight. The antenna are inter-changeable.

Sizes:

You can adjust the 3-4-5 gr float's loading capacity between 0 and +1,2 gr.

You can adjust the 6-7-8-10 gr float's loading capacity between 0 and +1,5 gr

PRO MATCH

Code: 1025

"Pro Match" floats contain all the useful developments that make the 'Control' version unique. As we have used brass removable heads, it is possible for finer adjustments to be made and for the carrying capacity to be increased still further. It is possible to make very quick, accurate and repeated adjustments by pushing in, or pulling out, the upper, thinner stem from the body of the float.

By sliding the tube to calibrate the float you can minutely adjust the weighting.

PRO MATCH with dart

Code: 1026

The adjustable capacity of the 4 gr float is: between 0 and +2,5 gr
 The 5 gr and 6 gr float is: between 0 and +3,0 gr
 The 7 gr and 8 gr float is: between 0 and +3,5 gr

New Carp floats

Unweighted carp floats
with PUR body

Carp floats
with fix weight

Code: 1090

Code: 1095

Heavy-duty fishing floats with pur body, developed to carp fishing

Reliable floats- even in extreme conditions

Code: 1021

Float with built in weight

Unweighted floats

Code: 1022

When we were creating the traditional type of tear drop floats it was our intention, as is always the company policy, to place the emphasis on making each model easy to use, infinitely variable and long lasting. The design allows all of the components, including the bristles, to be freely interchanged thus allowing numerous combinations to be achieved. The floats are available a near transparent fibre glass stem that is less visible in water.

Golf

Code: 1015
(fibr glass)

The special dimpled surface of this Golf float, which reduces water tension affects, makes it an ideal choice for use on rivers, moving canals and choppy lakes.

Sizes: 1 - 1.5 - 2 - 3 - 4
5 - 6 - 8

Spirit

Code: 1016
(fibr glass)

Universal shape which is ideal for both rivers and still waters. The protective plastic tube through the float is very hard wearing and makes the float virtually indestructible highly recommended when fishing for carp on the pole.

Sizes: 0,5 - 0,75 - 1
1.5 - 2 - 3 - 4 - 5 - 6

CAPRI

Code: 1017
(fibr glass)

This body shape allows for more sensitive presentation even more so if you use the 1 mm carbon or glass stem as the bristle. Also incredibly strong, however, and will handle big fish well.

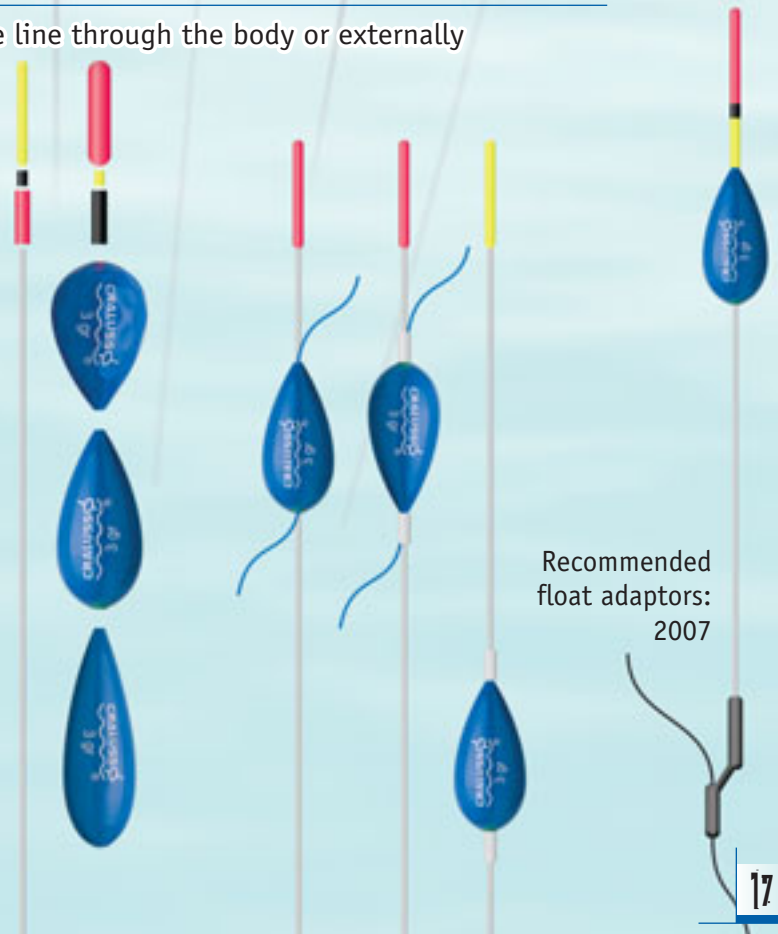

Sizes: 0,2 - 0,3 - 0,5 - 0,75 - 1
1.5 - 2 - 3 - 4 - 5 - 6

They are well constructed and very strong. Bristles are interchangeable so you can make rigs that perform well for delicate presentation or dealing with big weights of fish.

They can be set up with the line through the body or externally

Components of the tear drop floats are all interchangeable and they can be assembled in a number of ways to suit your own requirements only your imagination could limit the number of variations.

(3x11mm 7pcs/bag)

2022
Wolfram tuning lamellas
(3x13mm 7pcs/bag)

2003
Hollow antenna set
(6 pcs/bag)
Sensitive, highly visible hollow antenna with 0,3 gr sensitivity

2011
Universal star light holder
4,5 mm-es
(3 pcs/bag)

2034
(5 pcs/bag)

2004
Waggler float stem range
(3 pcs/bag)

2010
DIY floats
(8 pcs/bag)

2013
Carbon and glass stem
8 pcs 0,8 and 1,0 mm

Waggler attachment Light

(Fixed)

Code: 2005

A sure and safe float fixing that allows quick changes. Tangles and knots are reduced because of the built in big load bearing swivel. The attachment is very light as carbon is used in the manufacture.

We offer the small Waggler attachment for 8-10 gr floats, and the medium attachment for floats above 10 gr.

| Size | Code | Weight | Pcs/bag |
|--------|------|---------|---------|
| Small | 2005 | 0,22 gr | 3 pcs |
| Medium | 2005 | 0,35 gr | 3 pcs |

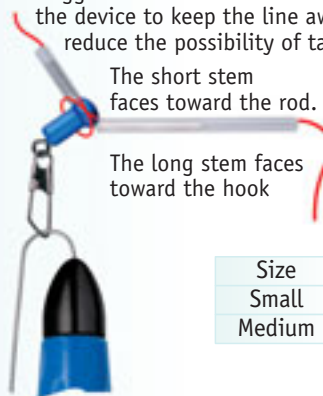

Anti tangle waggler attachment

(Fixed)

Code: 2006

Cralusso's own development! The success of the anti-tangle waggler attachment lies in the asymmetric design which allows the device to keep the line away from the float and so greatly reduce the possibility of tangles and knots.

The short stem faces toward the rod.

The long stem faces toward the hook

How to use this attachment?

| Size | Code | Weight | Pcs/bag |
|--------|------|---------|---------|
| Small | 2006 | 0,30 gr | 3 pcs |
| Medium | 2006 | 0,45 gr | 3 pcs |

Cralusso lines = Cralusso quality!

“PRESTIGE” fishing line – as the name implies, this range will satisfy the highest demands of the modern angler. We believe different disciplines of fishing require a line specifically designed for the purpose and that each must possess the correct properties for its intended use. As such, we have developed and tested the lines over a period of some years and are certain we are now offering a selection of the very best available at a truly competitive price.

Great attention to detail has been paid to ensure this line has the optimal relationship between strength and suppleness. It is reliable, strong and resistant to twist and tangles.

| Length (m) | Diameter (mm) | Breaking Strain (kg) |
|------------|---------------|----------------------|

Unique and individual innovation made by Cralusso is the **QSP system**, which one helps to reach the optimum line filling. With this solution can avoid the multi-winding and for the reel be over or underfilled. For the **QSP system** labeled lines you can find measuring plates attached which ones support the precise loading of the reel. The QSP downloadable as an application from Google Play and App Store.

1

Please, measure the diameter and height of the spool!

2

Please apply the measurements into the calculator that you will find on our webpage!

3

Select the appropriate value from the indicator and wind the stated amount onto the spool!

4

When you have wound the indicated amount of line onto the reel, it should be at the optimal level!

Cralusso lines = Cralusso quality!

NAVIGATOR

Match Sinking (150m) with QSP

2076

QSP SYSTEM

The Navigator Match Sinking line is a world first from Cralusso. Judging distance on water is very difficult for everyone. This new generation of line provides a solution for this problem. Every 5m you will find a mark, so you can determine the distance from the color-code (every color indicates different distance) and this will assist you to fish accurately at the same distance each cast. It possesses qualities of high abrasion resistance and low surface friction, which enables effortless casting and creates fast sink rates. You will find the illustration at the bottom of the page and further information on our website.

Cralusso's unique development of the QSP system is utilised on this line and allows spooling up to be completed quickly, accurately and precisely. The QSP system helps to ensure the optimum amount of line is put onto the spool. You can find further information on page 30 and on the relevant webpage.

Feeder Energy (200m) with QSP

2077

QSP SYSTEM

The Navigator Feeder fishing line provides great opportunities for both carp and feeder anglers.

Short and long range distances, features and clipping up points are easily identified and there is no problem if you use two or more rods. The line is marked every 5m and this will assist you to fish accurately at the same distance. Please look at the diagram and further information can be found on our webpage.

This line was developed in accordance with the requirements of high profile carp and feeder anglers - it is extremely strong, has a medium sink rate, possesses high tensile strength with low stretch and is an easily managed.

THE SOLUTION: The QSP system which is only provided by Cralusso! It will help to avoid the need for multiple attempts at filling spools accurately. You will find the description on page 30 and further information on our webpage.

Hooks

The biggest fish at the 2014 world championship held in Croatia, a 4,6kg barbel was caught on the fast-flowing Drava by Arjan Klop, member of the world champion Dutch team using our 2445 Chinu hook. This hook has also proven its worth many times! Made of forged Japanese steel, extremely sharp, despite its medium thick stem it is remarkably strong. A reliable companion during tiring.

No need to bother anymore with mounting, just hang up the balanced hooklength into the method snap from the box. The hook and the bait size, thickness of hooklength and balance lead harmonize with each other what is one of the main part of successful fishing. Contains one prepared hooklength per box.

Pop-up feeder basket fix

NEW 3295

Pop-up feeder basket adjustable

NEW 3296

The pop-up feeder basket weighs only 2 grams. Filled with feed, it sinks to the bottom and stays there until much of the feed is dissolved. Thereafter, its light buoyancy brings it slowly towards the surface, 'scanning' through the entire water column. Takes may be expected in multiple phases, either in midwater, with the bait sinking slowly together with the basket, or lying on the bottom, but often it is the bait rising up to midwater that triggers an intensive take. The speed of sinking or rising can be controlled thanks to the adjustable design.

New generation method baskets and fillers

A unique innovation: patented Cralusso method baskets with longitudinal ribs. Thanks to its special design the hook is less likely to become attached to the longitudinal ribs and it perfectly retains the feed as long as necessary and quickly releases it in the water. With its centre of gravity close to its front end it is particularly suitable for long and accurate throws. You can replace your feeder basket with one of a different size simply and quickly, without having to take apart your tackle.

Sensitive method basket

DOUBLE CHANCE method, a unique Innovation for catching more fish!

Duble Chance Method basket **NEW** 3315

| Kód | Súly | Db/csomag |
|---------|------------------------|-----------|
| 3315-25 | 25 gr Lead free | 1 db |
| 3315-30 | 30 gr Lead free | 1 db |
| 3315-40 | 40 gr Lead free | 1 db |
| 3315-50 | 50 gr | 1 db |
| 3315-70 | 70 gr | 1 db |

The Double Chance Method basket is Cralusso's latest, unique development. Use the newly developed basket for even more successful fishing! Two baits, of different flavours and buoyancies can be presented simultaneously to find the day's winner bait. When you pull out your rig after an unfinished or a missed take and check the hooklength (long one, see the drawing), you'll see which bait attracted the fish. While playing a hooked fish the other hook safely retracts into the basket tube – to keep the fish from being harmed and avoid getting the hook caught in rocks or vegetation in the water.

Assembling

SHELL Method mould **NEW** 3350

Cralusso's newly developed feeder basket filler of a universal size, provides quick and easy filling of your feeder basket. Thanks its design there's no need for pressing, the feed won't get stuck in it. Simply open the moulding tool off the filled basket. SHELL Method mould suitable for use with method baskets from multiple manufacturers.
